

Approved Combinations of Medically Important (VFD) Cattle Labels

Chlortetracycline (CTC) can be fed with

Decoquinatone
**Laidlomycin
**Lasalocid

*Chlortetracycline / Sulfamethazine can be fed with

No approved Combinations

Neomycin Sulfate can be fed with

No approved combinations

Oxytetracycline (OTC) can be fed with

Lasalocid
MGA

*Oxytetracycline / Neomycin Sulfate can be fed with

No approved combinations

Tilmicosin can be fed with

Monensin

Tylosin can be fed with

MGA
Monensin
MGA and Lasalocid
MGA and Monensin
Monensin and Zilpaterol
Monensin and Decoquinatone
Monensin and Ractopamine
MGA and Monensin and Ractopamine
MGA and Monensin and Zilpaterol

Virginiamycin can be fed with

No approved combinations

Approved Combinations of Non-Medically Important (OTC) Cattle Labels

Amprolium can be fed with

No approved combinations

Decoquinatone can be fed with

Chlortetracycline (CTC)
Monensin
Monensin and Tylosin

Babermycin (GAINPRO®) can be fed with

No approved combinations

Bacitracin Zinc (ALBAC®) can be fed with

No approved combinations

Bacitracin Methylene Disalicylate (BMD) can be fed with

Decoquinatone
Lasalocid
Monensin

Diflubenzuron can be fed with

Any feed unless contraindicated or prohibited by law

Tetrachlorvinphos (Rabon™) can be fed with

No approved combinations

Methoprene (Altosid®) can be fed with

Any feed unless contraindicated or prohibited by law

Fenbendazole can be fed with

No approved combinations

Melengestrol Acetate (MGA) can be fed with

Lasalocid
Monensin
Oxytetracycline (not in liquid)
Tylosin
Zilpaterol
Lasalocid and Tylosin
Monensin and Tylosin
Monensin and Zilpaterol
Monensin and Ractopamine
Monensin and Ractopamine and Tylosin
Monensin and Tylosin and Zilpaterol

Laidlomycin (Cattlyst®) can be fed with

**Chlortetracycline (CTC)

Lasalocid (Bovatec®) can be fed with

**Chlortetracycline (CTC)
Oxytetracycline (OTC)
MGA
MGA and Tylosin

Monensin (Rumensin®) can be fed with

Decoquinatone
MGA
Tylosin
Ractopamine
Tilmicosin
Zilpaterol
MGA and Tylosin
MGA and Ractopamine
MGA and Zilpaterol
MGA and Tylosin and Ractopamine
MGA and Tylosin and Zilpaterol
Tylosin and Decoquinatone
Tylosin and Ractopamine

Poloxalene can be fed with

No approved combinations

Ractopamine (Optaflex®) can be fed with

Monensin
Monensin and Tylosin
MGA and Monensin
MGA and Monensin and Tylosin

Zilpaterol (Zilmax®) can be fed with

MGA
Monensin
MGA and Monensin
Monensin and Tylosin
MGA and Monensin and Tylosin

This information has been taken from and verified from the CFR 21.558 and the Feed Additive Compendium 2017. Every attempt has been made to ensure its accuracy as of 10/21/16. Changes may occur as the new labels come on line near the Jan 2017 implementation date of GFI #213. Users are responsible to verify with the Feed Additive Compendium or manufacturers before finalizing any decision.

** FDA approval provides only for use of CTC products manufactured by NADA sponsor No. 05477 (Zoetis)

* Fixed rate combination
